

Investment Opportunity - Exploration License Sale

JIBAL AS SITARAH GOLD- COPPER LICENSE

Aseer Region, Kingdom of Saudi Arabia

OCTAWIZ Consulting

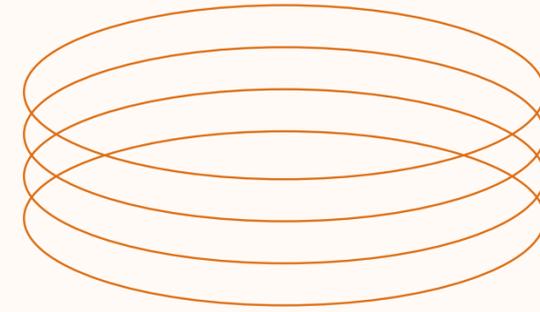

Executive Summary

- **License Name:** Confidential (available under NDA)
- **Location:** Tathleeth District, Aseer Province, KSA
- **License Area:** 92.87 km²
- **License Validity:** Until 5 June 2028
- **Commodity Focus:** Gold (primary), with visible Copper, Silver, Zinc, Lead, and Nickel occurrences
- **Project Status:** Registered, mapped, and under preliminary reconnaissance and field validation

Project Highlights

- **Strategic Location:** Located in the Arabian Shield's Nabitah-Tathleeth fault zone – a proven belt hosting gold-copper deposits.
- **Surface Indications:** Exposed quartz vein systems, copper oxide staining, and mineralized trenching zones.
- **Accessible Terrain:** Mapped road access, minimal vegetation, exposed ridges for efficient trenching and drilling.
- **Confirmed Mineral Indicators:**
 - Visible gold oxide mineralization in silicified brecciated quartz veins
 - Chrysocolla and azurite copper mineralization
 - Thick quartz vein outcrop along structural shear

Investment Proposition

Transaction Type:

- Full transfer of mineral exploration license (92.87 km²)

Ownership:

- Held by private investor; fully compliant with Ministry of Industry and Mineral Resources (MIMR)

Deal Structure:

- Direct acquisition
- JV with staged buyout

Deliverables:

- All license documentation, GIS files (KML/KMZ), satellite maps, trench maps, and samples

Why Invest in This License?

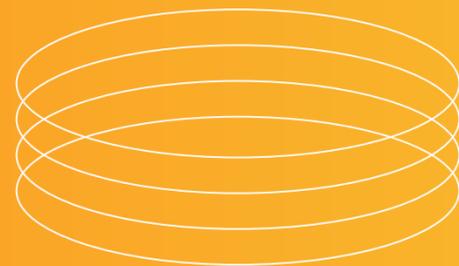

- Rare opportunity to acquire a large, mineralized block in the Arabian Shield
- Proven gold & copper indicators with surface confirmation
- Ministry-registered license with clear validity to 2028
- Opportunity to fast-track to drilling and resource definition
